| <b>COURSE CODE: CSC3066</b>                     | <b>L-T-P: 4-1-1</b>                                  |
| <b>COURSE NAME: DATA MINING AND WAREHOUSING</b> | <b>CONTACT HOURS/WEEK: 7</b>                         |
| <b>COURSE TYPE: ELECTIVE/OPEN</b>               | <b>TOTAL MARKS: 100 (INTERNAL: 60, EXTERNAL: 40)</b> |
| <b>NUMBER OF CREDITS: 6</b>                     | <b>NATURE: GRADED</b>                                |

### **COURSE OBJECTIVES:**

1. To introduce students the basic concepts of Data Warehouse and techniques and applications of Data Mining.
2. To develop skills for designing and implementing systems for data mining to solve practical problems in a variety of disciplines.
3. To provide students the experience of doing independent study and research.

### **COURSE PREREQUISITE:**

- Programming knowledge of C, C++.
- Basic knowledge of Mathematics-Statistics.
- Basic concepts of Database.

### **COURSE OUTCOMES:**

#### **At the end of the course, students will be able to:**

- explain the components and architecture of data warehouse architecture
- Illustrate different data mining techniques such as association rule mining, clustering and classification.
- Analyze different data mining algorithms such as K-means, DBSCAN, FR-tree growth, A priori, CURE, BIRC, ROCK, CART, C4.5 etc.
- Analyze the uses of developing areas-web mining, text mining and sequential data mining.

### **COURSE CONTENT:**

| <b>Unit No &amp; Name</b>                  | <b>Components of the Unit</b>  | <b>No of contact hours</b> | <b>Marks</b> |
|--|--|----------------------------|--------------|
| <b>UNIT-I: Introduction to Data Mining</b> | <ul style="list-style-type: none"> <li>• <b>Basic Concepts:</b> Data Mining, kinds of patterns that can be mined, Data Mining versus Database systems, Data preparation, cleaning and visualization.</li> <li>• <b>Data Warehousing:</b> Differences between database systems and Data Warehouse, Data Warehouse architecture and its components, Warehouse versus Data Mining (OLTP &amp; OLAP), OLAP tools,</li> </ul> | 20                         | 30           |

|  |  |    |     |
|--|--|----|-----|
|  | Data cubes, Multidimensional Data.   |    |     |
| <b>UNIT-II: Data Mining Techniques</b> | <ul style="list-style-type: none"> <li>• <b>Association Rules:</b> What is an association rule? Mining association rules, frequent sets and border sets, algorithms for mining association rules – A priori algorithm, Pincer-search algorithm, Border algorithm, FP-tree growth algorithm, generalized association rule, association rule with item constraints.</li> <li>• <b>Clustering:</b> Hierarchical versus Partitional clustering, types of data in clustering, Partitional algorithms – k-means, k-medoids, PAM, CLARA, CLARANS. Density based clustering algorithm – DBSCAN. Hierarchical algorithms – BIRCH, CURE. Categorical clustering algorithms – ROCK, CACTUS.</li> <li>• <b>Decision Trees :</b> Introduction, tree construction principle, decision tree generation algorithms – CART, ID3, C4.5</li> <li>• <b>Other techniques for Data Mining :</b> Concepts of Genetic algorithms, Artificial Neural Network and Rough sets and their application in the domain of data mining. Introduction to Web Mining, Text Mining, Temporal data mining.</li> </ul> | 70 | 70  |
|  | <b>TOTAL</b>   | 90 | 100 |

#### TEXTBOOKS/ RECOMMENDED READINGS:

- Puzari K.; *Data Mining Techniques*; University Press
- Han J., Kamber M.; *Data Mining Concepts and Techniques*; India Morgan Kaufmann & Harcourt
- Soman K. P., Diwakar S., Ajay V.; (2008); *Insight into Data Mining: Theory and Practice* ; P.H.I (Eastern Economy Edition
- Jain K. and Dukes R. C.; *Algorithms for Clustering Data*; Prentice-Hall
- Cios K., Pedrycz W., Swiniarski R; (1998); *Data Mining : Methods of Knowledge Discovery*; Boston Kluwer Academic Publishers, ,

#### COURSE ASSESSMENT DETAILS:

**Internal assessment:** Class tests, Assignments, Laboratory tests, Seminar

**External assessment:** End Semester Examination

## DEPARTMENT OF COMPUTER SCIENCE

Gopinath Bordoloi Nagar, Gauhati University

Guwahati-781014, Assam, India

### LESSON PLAN

Subject Name : **Data Mining and Data Warehousing**  
Paper Code : **CSC3066/INF3066** Session: **2019-2020**  
Program Name : **M.Sc. (CS/IT)** Semester: **Third**  
Faculty Name : **Dwipen Laskar**  
Date : **July, 2019 to December, 2019**

#### Detailed Lesson Plan

##### UNIT-I (Introduction to Data Mining)

| Lecture No | Topics to be Covered   |
|------------|--|
| 1          | <b>Basic Concepts:</b> Data Mining, Definition, kinds of patterns that can be mined, |
| 2          | KDD vs Data Mining, DBMS vs DM, Other Related areas                                  |
| 3          | Data Mining versus Database systems, Data preparation                                |
| 4          | Issues and Challenges in DM, Application areas of DM                                 |
| 5          | Data cleaning and visualization.   |
| 6          | <b>Data Warehousing:</b> Differences between database systems and Data Warehouse     |
| 7          | Data Warehouse architecture and its components                                       |
| 8          | Warehouse Server, Meta Data, Warehouse versus Data Mining                            |
| 9          | OLTP Engines & OLAP  |
| 10         | OLAP tools   |
| 11         | Data cubes   |
| 12         | Multidimensional Data  |

##### UNIT-II (: Data Mining Techniques)

|    |  |
|----|--|
| 13 | <b>Association Rules:</b> What is an association rule? Mining association rules, Methods to discover association rules |
| 11 | Frequent sets and border sets  |
| 12 | Algorithms for mining association rules – A priori algorithm   |

|    |   |
|----|---|
| 13 | Partitioned Algorithm   |
| 14 | Pincer-search algorithm   |
| 15 | Dynamic Item set Counting Algorithm   |
| 16 | Border algorithm  |
| 17 | FP-tree growth algorithm  |
| 18 | Rapid Association Rule Mining, Eclat and dEclat                                     |
| 19 | Generalized association rule  |
| 20 | Association rule with item constraints  |
| 21 | <b>Clustering:</b> Clustering Paradigms, Hierarchical versus Partitioned clustering |
| 22 | Types of data in clustering   |
| 23 | Partitional algorithms – k-means  |
| 24 | Partitional algorithms – k-medoids  |
| 25 | Partitional algorithms – PAM  |
| 26 | Partitional algorithms – CLARA  |
| 27 | Partitional algorithms – CLARANS  |
| 28 | Density based clustering algorithm – DBSCAN   |
| 29 | Hierarchical algorithms – BIRCH   |
| 30 | Hierarchical algorithms – CURE  |
| 31 | Categorical clustering algorithms – ROCK  |
| 32 | Categorical clustering algorithms –CACTUS   |
| 33 | clustering algorithms –STIRR  |
| 34 | <b>Decision Trees :</b> Introduction, tree construction principle, Best Split       |
| 35 | Splitting Indices, Splitting Criteria   |
| 36 | DECISION tree generation algorithms – CART  |
| 37 | DECISION tree generation algorithms –ID3  |
| 38 | DECISION tree generation algorithms –C4.5   |
| 39 | DECISION tree generation algorithms –CHAID, RainForest                              |
| 40 | DECISION tree generation algorithms –CLOUDS, BOAT                                   |

|    |  |
|----|--|
| 41 | Pruning Techniques, Integration of Pruning and Construction  |
| 42 | <b>Other techniques for Data Mining</b> : Concepts of Genetic algorithms, Foundation of Genetic Algorithms, Search space |
| 42 | Operators of Genetic Algorithms: Selection, Crossover, Mutation, Application of Genetic Algorithms                       |
| 43 | Artificial Neural Network: Perceptron, Characteristics of ANN , Multilayer ANN   |
| 44 | Linear Support Vector Machine: Separable and non Separable   |
| 45 | Non-linear SVM, characteristics of SVM   |
| 46 | Rough sets: concepts and Definition  |
| 47 | REDUCT in Rough Set, Rule Extraction   |
| 48 | Rough Set and Fuzzy Sets, Application of Rough Sets in the domain of data mining   |
| 49 | Introduction to Web Mining , Web Content Mining, Page Rank, Web Usage Mining   |
| 50 | Text Mining, Unstructured Text, Episode Rule Discovery for Texts, Text Clustering  |
| 51 | Temporal data mining, Temporal Association Rules   |
| 52 | Sequence Mining, GSP Algorithm   |
| 53 | SPADE (Sequential Pattern Discovery using Equivalence Classes)   |
| 54 | SPIRIT (Sequential Pattern Mining with Regular expression Constraints), WUM (Web Utilization Miner)                      |

**(Dwipen Laskar)**  
 (Assistant Professor, Dept. of Computer Sc., GU)
